**NEW PRODUCT!**

**BBR CRF150R**

**BBR Motorsports launches its new suspension upgrades for the all new 2007 CRF150R.**

**Seattle, WA** – BBR has been building, developing and racing four-stroke 150cc bikes since the early 1990's. The development team has utilized this experience to come up with the optimum spring rates for adult-sized riders on this revolutionary new machine. "The adult riders we have used to test the stock CRF150R along with the recent magazine reviews have all suggested that the bike is sprung for kids." Says Duane Brown, President of BBR Motorsports. The springs BBR has developed are for the rider that wants to maximize the fun-factor on their 150R. This must-have upgrade is available now.

**NEW! BBR CRF150R Heavy Duty Fork Springs**

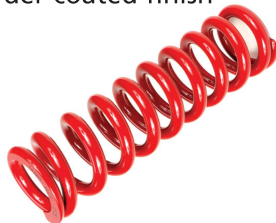

Designed for adult-sized riders with a heavier spring rate of .44 kg. Pre-set and stress-relieved for long life.

**(650-HCR-8005, Fork Springs – CRF150R, 2007) \$79.95**

**NEW! BBR CRF150R Heavy Duty Shock Spring**

Designed for adult-sized riders with a stiffer spring rate of 6.2 kg. Custom-wound from aircraft-quality spring steel. Powder-coated finish

**(660-HCR-8005, Shock Spring - CRF150R, 2007) \$89.95**
