E-6 Fork Kit Specs

BBR E-6 Fork Kits come **standard** with **175cc** per leg of **10wt** fork oil and **.50kg** fork springs. This setting works great for *an average size adult of 150lbs under normal play riding conditions.*

Fork settings should be fine-tuned for your weight and riding ability using different oil weights, oil volumes and springs.

Recommended BBR settings:

RIDER	OIL WEIGHT	OIL VOLUME	SPRING RATE
80lb Beginner (kid)	5 or 10wt	150cc per leg	.50kg
125-150lb Play Riding	10 or 15wt	175cc per leg	.50kg
150-175lb Play Riding	15 or 20wt	180cc per leg	.50kg
175 and Up or Aggressive Riding	20 or 30wt	180cc per leg	.62kg

MINIMUM OIL 150cc

MAXIMUM OIL 180cc

Optional fork oil weights can be found at your local dealer.

Optional .62kg fork springs (650-KLX-1105) can be purchased direct from BBR or from your local dealer.

WARNING

Excessive and/or continued fork bottoming, and/or using more than 180cc of fork oil per leg will result in leaking or blown fork seals. Replacement BBR fork seals are available (635-HXR-5200).

For assistance with fork kit installation or with fine-tuning your BBR E-6 fork kit, please contact your local dealer or contact technical support at BBR Motorsports at 1-888-668-6227.

Thanks for riding with BBR!
